Actions Required

- For patients with insufficient supplies of their oral contraceptive to last until the resupply date, clinicians should consider prescribing an alternative OCP following the advice contained in this MSN (see summary table and supporting information).
- Where unlicensed imports are deemed appropriate, prescribers should work with local pharmacy teams to ensure orders are placed within appropriate time frames as lead times vary (see supporting information),
- Clinicians (both prescribing and dispensing) should counsel patients regarding the different brand and dosing regimen prescribed, where appropriate.
- Specifically, for patients with insufficient supplies of Synphase® tablets to last until the resupply date, prescribers should consider prescribing:
 - an alternative phasic oral contraceptive (see supporting information below);
 - an alternative non-phasic oral contraceptive; or
 - an unlicensed import of Synphase® tablets (see supporting information below).

<https://www.england.nhs.uk/publication/a-guide-to-managing-medicines-supply-and-shortages/>

Supporting Information

Guidance on ordering and prescribing unlicensed imports:

- The following specialist importers have currently confirmed they can source unlicensed Synphase® tablets with variable lead times (please note, there may be other companies that can also source supplies):
 - Clinigen
 - Mawdsleys Unlicensed
 - Target Healthcare

Any decision to prescribe an unlicensed medicine must consider the relevant guidance and NHS Trust or local governance procedures. Please see the links below for further information.

- [Prescribing unlicensed medicines](#), General Medical Council (GMC)
- [The supply of unlicensed medicinal products](#), Medicines and Healthcare products Regulatory Agency (MHRA)
- [Professional Guidance for the Procurement and Supply of Specials](#), Royal Pharmaceutical Society (RPS)
-

When prescribing a product that is not licensed in the UK due to a supply issue with the licensed alternatives prescribers must indicate on the FP10 prescription that an unlicensed product is required. This can be done by annotating the prescription with the following wording: “**special order**”.

Clinical information:

- For further information on the constituents of phasic oral contraceptives, see the table below:

Oral Contraceptive	Supplier	Number of tablets	Ethinylestradiol content (micrograms)	Levonorgestrel content (micrograms)	Norethisterone content (micrograms)
