Alert Status Trend

GPAS – COMMENT / ANALYSIS

The county wide assessment this week is AMBER / OPEL 2 with all reporting practices assessed as covering a total patient population of 198,358, which is a decrease of 14,317 from last week's reporting. No practices reported as red this week. There are 120,916 patients who are covered by amber practices which is an increase of 25,596 from

last week's reporting. There are 77,442 patients who are covered by green practices, which is a decrease of 39,913 from last week's reporting. The indicative number of patient contact has decreased to 5,505 which is 303 less than last week's reporting. The submission data for this week was derived from 19 practices submitting, which is less than last week's reporting. Currently there is 1 practice that identifies as not being in a PCN, which is outlined in the above table. Clinical activity has increased for North and Calder & Ryburn PCN and stayed the same for Central and Lower PCN. Clinical activity has slightly decreased for Upper PCN.

PRACTICE COMMENTS

The purpose of the weekly quotes, extracted from comments submitted in GPAS, is just to provide human context from the front line:

"Spike in absence this week across clinical and non-clinical roles."

SYSTEM ACTIONS/COMMENTS ON LAST SITREP

The return rate has decreased this week, with 2 practices not submitting data, therefore the clinical data such as number of patient contacts in practices and clinical activity/1000pts submitted this week may not be truly representative of actual for all of Calderdale.

The LMC continues to have direct dialogue with practices and offer their support to practices.

The overall OPEL assessment is a confident position though as an average across PCN and Calderdale.

SUMMARY – to be updated with current issues

The LMCs continue to be concerned about the resilience and forbearance of practice teams across the county; all the signs are that the exhausted workforce is under pressure and that is set to deepen.

The key issues summarised below remain extant.

ISSUE	FIRST RAISED	LEAD
Unauthorised Transfer of work from Secondary to Primary care		STP/CCP
Patient expectations Management (national)		NHSE
Practice capacity to sustain current rates of delivery above core contract		CCP
Workforce retention		System

The LMC is happy to discuss informally with the CCP on the above to ensure we are coherent on context etc.
