Alert Status Trend

GPAS – COMMENT / ANALYSIS

The county wide assessment this week is AMBER / OPEL 2 with all reporting practices assessed as covering a total patient population of 223,388, which is a decrease of 154 from last week's reporting. One practice reported as red this week, which covers 8,819 patients, which is an increase of 20 from last week's reporting. There are 166,239 patients who are covered by amber practices which is an increase of 4,926 from last week's reporting. Six practices reported as green, which covers 48,330 patients, which is a decrease of 5,100 from last week's reporting. The

indicative number of patient contact has increased to 5,510 which is 4more than last week's reporting. The submission data for this week was derived from 20 practices submitting, which is the same as last week's reporting. Currently there is 1 practice that identifies as not being in a PCN, which is outlined in the above table. Clinical activity has increased for North, Upper and Lower PCN's, as well as the PCN who identifies as not being in a PCN. Clinical activity has slightly decreased for Central and Calder & Ryburn PCN's.

PRACTICE COMMENTS

The purpose of the weekly quotes, extracted from comments submitted in GPAS, is just to provide human context from the front line:

"New starters training in reception, phone times still under pressure as demand still high."

"Staffing shortage and sickness."

SYSTEM ACTIONS/COMMENTS ON LAST SITREP

The return rate has remained the same this week, with all practices submitting data, therefore the clinical data such as number of patient contacts in practices and clinical activity/1000pts submitted this week, will be truly representative of actual for all of Calderdale.

The LMC continues to have direct dialogue with practices and offer their support to practices.

The overall OPEL assessment is a confident position though as an average across PCN and Calderdale.

SUMMARY – to be updated with current issues

The LMCs continue to be concerned about the resilience and forbearance of practice teams across the county; all the signs are that the exhausted workforce is under pressure and that is set to deepen.

The key issues summarised below remain extant.

ISSUE	FIRST RAISED	LEAD
Unauthorised Transfer of work from Secondary to Primary care		STP/CCP
Patient expectations Management (national)		NHSE
Practice capacity to sustain current rates of delivery above core contract		CCP
Workforce retention		System
Workforce – Due to a combination of staffing vacancies and sickness, administration / reception teams across Calderdale are down by around 20%. This has led to long delays in meeting the above demands, and in some cases severe delays in responding.	12.12.22	System
Clinical capacity – Again, vacancies/sickness levels amongst key clinical roles is now above manageable levels. This is now at a level where many of our GPs are delivering patient contacts at more than 50% of the anticipated number. This is also combined with a high level of shortfall in nursing/other clinical roles within general practice teams.	12.12.22	System

The LMC is happy to discuss informally with the CCP on the above to ensure we are coherent on context etc.
